

Brandon Alister L. Quijana

Technical Support | AI Implementation | Healthcare Correspondence | Web Designing
Angeles City, Pampanga, Philippines | brandonalisterquijana@gmail.com

PROFILE

Detail-oriented and self-driven IT professional with a lifelong interest in hardware and software troubleshooting, formalized through a TVL-ICT senior high school track and a bachelor's degree in computer science. Currently working as a Correspondence Specialist at Ventra Health, a U.S.-based healthcare company, where I manage medical records, liaise with attorneys, resolve claims, verify billing, and handle insurance and denial-code disputes under strict HIPAA compliance. I bring hands-on experience with basic coding and databases (SQL, VSCode, Cursor), foundational Azure application knowledge, and ticketing-system workflows, alongside a growing, self-taught interest in AI implementation using tools such as n8n, Go High Level, and Make. During my academic studies, I contributed to an AI-powered learning analytics thesis project that helped teachers itemize student scores and adjust their teaching methods. I combine steady technical troubleshooting instincts with an eagerness to keep learning — currently pursuing further certifications and personal AI-implementation projects while building a career that bridges technical support, healthcare operations, and applied AI.

CAREER

Correspondence Specialist *August 2025 – Present*

Ventra Health (U.S.-based Healthcare Company)

- Gather and manage medical records, correspond directly with attorneys, and help resolve claims by supplying accurate patient data.
- Conduct payment studies and verify patient billing, ensuring accuracy across claims documentation.
- Apply working knowledge of insurance conditions, denial codes, and dispute-resolution processes for U.S.-based clients.
- Maintain strict adherence to HIPAA regulations within standardized, script-based communication practices.
- Use ticketing systems and basic Azure application knowledge to support internal workflows and troubleshoot day-to-day technical issues.
- Apply AI tools to streamline note construction and documentation while self-studying AI implementation platforms such as n8n, Go High Level, and Make.

Technical Support / Retail Operations Assistant *February 26 – March 9, 2024*

11th Asian Age Group Aquatics Championships

- Conducted routine checks on internet connectivity and router performance, ensuring stable, high-speed network access across event sections.
- Assisted in the cafeteria's QR-based logging system, streamlining check-in for athletes and staff.
- Supported print station operations and provided technical assistance for network-related tasks, contributing to seamless event coordination.

UI/UX Development Department *April 22, 2024 – July 1, 2024*

Simplevia Technologies

- Designed responsive, user-friendly web pages in Figma for a Local Government Unit (LGU) in the Philippines, aligning with branding and accessibility standards.
- Developed interactive prototypes to enhance the functionality and visual appeal of web interfaces.
- Collaborated closely with the design team, demonstrating strong communication and adaptability in a professional design environment.

PROJECTS

AI-Powered Learning Analytics System *Undergraduate Thesis Project*

System Plus College Foundation

- Built a system to help teachers itemize student scores and gather performance data to inform and adjust teaching strategies.
- Served as a foundational thesis project; scope was limited by available resources but demonstrated practical understanding of AI's scalability for future applications.
- Currently planning independent AI-implementation projects and part-time technical projects to continue building applied experience.

EDUCATION

Bachelor of Science in Computer Science 2021 – 2025

System Plus College Foundation

TVL (Technical Vocational and Livelihood) – ICT 2019 – 2021

System Plus College Foundation

SKILLS

-
- Hardware & Software Troubleshooting
 - Technical Support & Ticketing Systems
 - Basic Coding & Databases (SQL, VSCode, Cursor)
 - Basic Microsoft Azure Applications
 - AI Implementation (n8n, Go High Level, Make)
 - Medical Records Management & Correspondence
 - Claims Processing & Payment Verification
 - Insurance Knowledge & Denial Code Disputes
 - HIPAA Compliance
 - Web Design & UI/UX (Figma)
 - Data Entry | Communication Skills | Team Collaboration
